# Huh?

- Free and Open Source Software
- Common Collaboration Tools for Desktop users
- Work on MS Windows..

# Mozilla Thunderbird

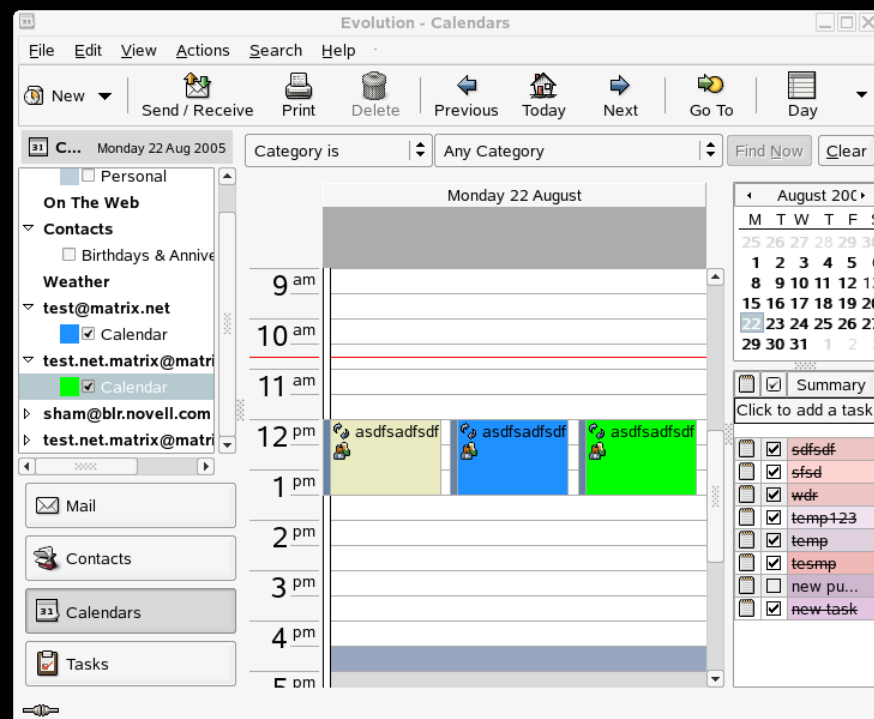

- Mozilla's Email Client
- Extensible and Flexible
- Secure
- FOSS

# Novell Evolution

- Evolution Suite of applications
- Evolution provides integrated mail, addressbook and calendaring functionality
- MS Exchange integration
- Gaim/Pidgin integration

# Mozilla Firefox

- Mozilla's flagship Web browser
- Simplicity and Elegance
- Flexible and Customizable

# But Why FF?

- Security: Using Firefox will block many websites from trying to install spyware and other mal-ware from getting onto your computer, which is a common problem with other browsers.
- Popup blocking: Firefox has a very good built in popup blocker that blocks all those annoying popups when you open up a web page.
- Advanced Features: Firefox has many advanced features like tabbed browsing that has all of your open pages in tabs in one window instead of having every page on a different window.

# But Why FF ? ...

- Extensions: Firefox has many useful extensions and plugins. They are add-ons to the browser that adds functionality.
- Excellent Interface: Firefox has a clean, simple interface that makes it easier to use and work on slower machines. The browser only comes with the essentials that makes it less prone to crashing, easier to use, and function better on older or slower computers.
- It's FOSS !

# FoxClocks

The screenshot shows a Mozilla Firefox browser window displaying the FOSS Sri Lanka website. The website has a blue header with the FOSS Sri Lanka logo and a search bar. The main content area is titled 'FOSS-ed for Windows' and features a large graphic with the text 'FOSS-ed for Windows'. Below the graphic, there is a section for 'Registration now open' with a paragraph of text. To the right of the main content, the FoxClocks application is open, showing a 'Zone Picker' window. The 'Zone Picker' window has a table with columns for 'Time Zone' and 'GMT/UTC Offset'. The 'Watchlist' window is also open, showing a table with columns for 'Location' and 'Time'. The browser's status bar at the bottom shows the current time and date for various locations, including Colombo: Mon 11:53.
